Management Comment

Dr. Kalamparambil Varkey Tolin,
Chairman & Managing Director
Tolins Tyres Limited

"I am happy to share that the H1 FY25 performance was in line with our expectations. Our revenue from operations grew by 74% year on year, on the back of increased demand from our customers and growth from our OEM business. During this period, we also launched three new tyre models for the two wheeler segment which has been highly appreciated by the market. This growth is a reflection of the implementation and execution of growth strategies adopted by our Company over the last two years. We have a fully backward integrated set up that gives us greater control over costs and supply chain leading to better profitability. The strong topline growth coupled with lower cost and higher realization spruced up the PAT growth of over 46% in H1FY25.

With nearly four decades of industry experience and a deep market understanding coupled with a strong reputation, the Company is all set to drive innovation and growth. With increasing geographical footprint and expanding client base, we are confident of achieving higher capacity utilization by the end of current fiscal enabling us to sustain current growth trajectory and strive for higher.

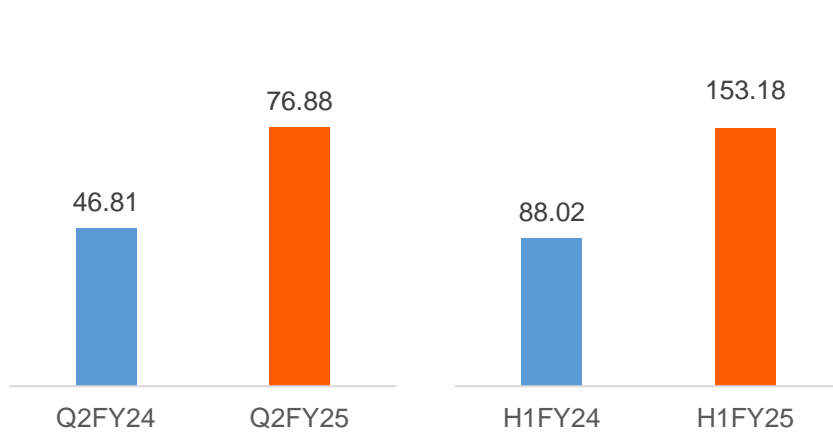

I must take this opportunity to acknowledge the dedication of the entire team of Tolins and thank them for their strategic insights, which are crucial for navigating industry changes and seizing new opportunities. We also thank all our stakeholders for their confidence and continued support. As we look to the future, we remain committed to excellence and confident in our path forward."
